

TAPE LABELER

NTL-200

High Performance and compact body dedicated liner-less labeler.

No more liners! Auto Labeler dedicated for the liner-less tape labels

No Wastage!

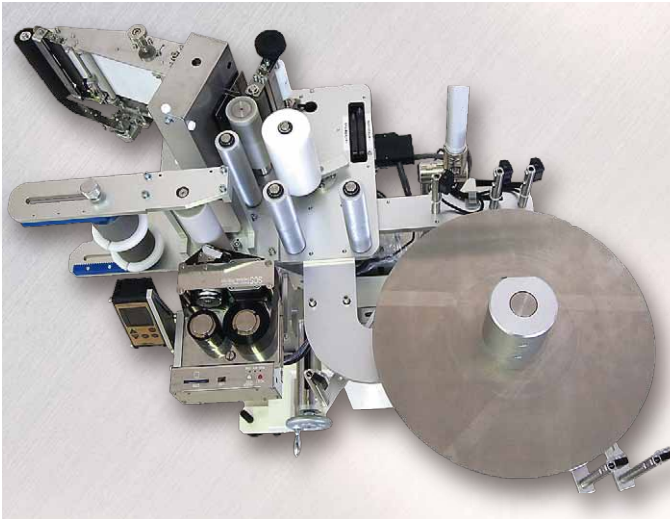

No liner, no wastage!

An environment-friendly labeler with the help of our liner-less labels contributes to the CO2 reduction and thus suitable for your eco-initiatives. Tape Labeler is a compact labeler that does not require liner winding unit.

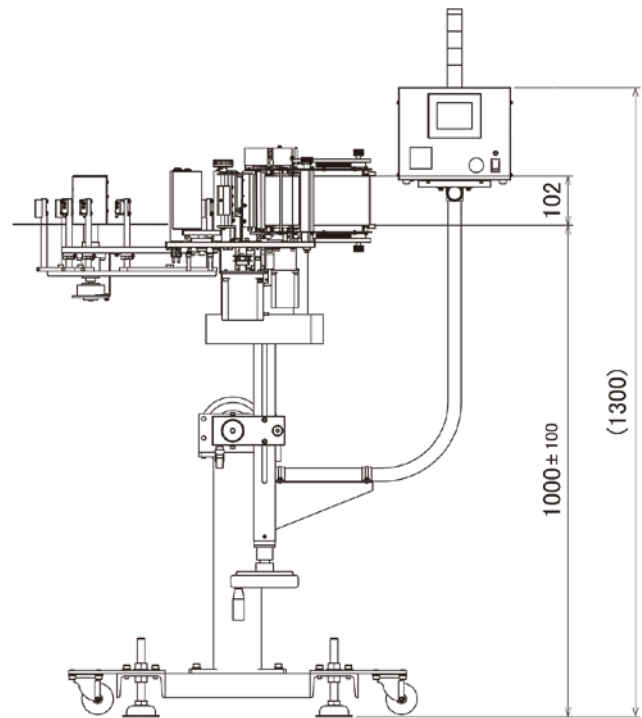

2x Productivity!

The liner-less labels can hold approximately twice the amount of labels than any conventional label with liner in the same winding diameter. As label winding volume doubles, frequency of replacing labels reduces to half which yields in high productivity and results in high efficiency.

No liner winding unit required.
Simple unit structure lets you replace labels easier than ever!

Thermal printer and printing inspection unit can also be installed (Optional).

Tape Labeler NTL-200	
Labels	Liner-less tape labels
Pasting capability	Label cueing speed 10m / minute - 24m / minute
Pasting accuracy (stopping accuracy)	±1mm
Driving motor	Stepping motor
The width of pasted board to be used	Minimum 50mm - Maximum 100mm
Label roll dimension	Maximum 300mm
Inner diameter of the paper core	76.2mm (3inch)
Power supply / power consumption	AC100V±10% 50 / 60Hz±5% 200VA or below
